PROFESSIONAL SUMMARY

FULL STACK ENGINEER — MERN STACK & AI/ML INTEGRATION

Highly motivated Computer Science candidate proficient in modern Full Stack Development using React.js, Node.js, and Flask, with a proven track record in deploying scalable solutions via cloud-based tools. Expertise includes Machine Learning integration, RESTful API development, and data-driven analysis. Targeting a challenging Full Stack role where expertise in MERN stack and AI/ML integration can drive product innovation.

TECHNICAL SKILLS

Languages: Python, JavaScript (React.js/Node.js), C, Java, R, SQL

Frameworks/Libraries: React.js, Node.js, Flask, Express.js, Scikit-learn, Pandas, Streamlit

Databases & Tools: MySQL, Firebase (NoSQL), Git, GitHub, Docker, AWS/GCP, L^AT_EX

Core Concepts: Full Stack Development, Data Structures & Algorithms (DSA), Agile, MLOps, System Design, RESTful APIs, CI/CD

PROFESSIONAL EXPERIENCE

NEST Kakkanad

Machine Learning Intern

Kakkanad, Kerala
Feb 2026 – Mar 2026

- Engineered a production-ready Telecom Customer Churn Prediction data pipeline, successfully establishing robust predictive insights capabilities, by integrating Python, Pandas, and Scikit-learn.
- Analyzed 10,000+ data points, achieving a 15% stabilization in data quality, by conducting Exploratory Data Analysis (EDA) and rigorous feature engineering.
- Deployed classification models (Random Forest, Logistic Regression), achieving an 87% prediction accuracy in customer churn forecasting, by fine-tuning underlying hyperparameters.
- Validated model performance, verifying high predictive reliability, by evaluating critical metrics including ROC-AUC, precision, recall, and confusion matrix.

ICT Trivandrum

Flutter Intern

Trivandrum, Kerala
Jun 2024 – Jul 2024

- Architected foundational cross-platform mobile components, successfully augmenting full-stack architecture design processes, by leveraging early-stage Flutter development methodologies.

PROJECTS

Study Flow – AI-Powered Study Management System

Full Stack Developer

- Developed a full-stack AI-based study assistant, successfully generating structured learning plans and automated quizzes from raw syllabus documents, by leveraging LLM and OCR (Tesseract).
- Implemented key productivity features, measurably improving user study efficiency, by integrating NLP-based doubt resolution, syllabus summarization, and a Pomodoro timer/task planner.

AI Health Chatbot

Full Stack Developer

- Engineered a high-availability full-stack AI health chatbot, effectively delivering context-aware and symptom-based user guidance, by utilizing React, Node.js, and structured medical datasets.
- Optimized real-time chat history management and persistent data storage, ensuring robust and uninterrupted user interactions, by implementing a vector-based retrieval system and integrating Firebase.

EDUCATION

Amal Jyothi College of Engineering (Autonomous)

B.Tech in Computer Science | CGPA: 7.9

Kanjirappally, Kerala
2023 – 2027

CERTIFICATIONS & AWARDS

Certifications: Machine Learning (Coursera), Data Structures and Algorithms, Complete Python Course (Udemy)

Awards: Selected for i2u Phase 2 – Recognized for innovation and entrepreneurial potential
